

## Custom Ceramic Coating Request for Quote (RFQ)

ceraX Functional Ceramic Coating — Custom Specification Request Form

*This form is to be completed by the customer with the desired specifications, target values, and intended use. Upon receipt, C&L Komechi Corporation will review the information to determine cost estimation and product development direction (matching to suitable product lines, custom formulation review, etc.), and will respond with a separate quotation.*

Date: \_\_\_\_\_ Document No. (assigned internally upon receipt): \_\_\_\_\_

### ① Requesting Company / Contact Information

|                                                                                          |       |
|------------------------------------------------------------------------------------------|-------|
| <b>Company Name</b>                                                                      | _____ |
| <b>Business Registration No.</b>                                                         | _____ |
| <b>Contact Person / Title</b>                                                            | _____ |
| <b>Phone / Mobile</b>                                                                    | _____ |
| <b>Email</b>                                                                             | _____ |
| <b>Fax</b>                                                                               | _____ |
| <b>Company Address</b>                                                                   | _____ |
| <b>Industry / Business Type (e.g., construction, manufacturing, facility management)</b> | _____ |

### ② Requested Product Category (check all that apply)

| Product Category                                    | Select                   | Remarks                                           |
|-----------------------------------------------------|--------------------------|---------------------------------------------------|
| Anti-corrosion (rust prevention) coating            | <input type="checkbox"/> | Prevents corrosion of steel                       |
| Exterior wall / rooftop / heat-reflective coating   | <input type="checkbox"/> | Concrete exterior walls, rooftops, etc.           |
| Primer (undercoat)                                  | <input type="checkbox"/> | Base preparation before topcoat                   |
| Heat-dissipating (thermal) coating                  | <input type="checkbox"/> | Overheat control for batteries, electronics, etc. |
| Fire-retardant / non-combustible coating            | <input type="checkbox"/> | Includes fireproofing for wood, textile, paper    |
| Rust-inhibiting / anti-corrosion protective coating | <input type="checkbox"/> | Suppresses and protects against metal rust        |
| Waterproof coating                                  | <input type="checkbox"/> |                                                   |
| Floor coating (abrasion-resistant)                  | <input type="checkbox"/> |                                                   |
| Other (please specify)                              | <input type="checkbox"/> | _____                                             |

### ③ Target Substrate & Application Environment

|                                                                                                 |                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Substrate material (check all that apply)</b>                                                | <input type="checkbox"/> Steel <input type="checkbox"/> Concrete <input type="checkbox"/> Wood <input type="checkbox"/> Textile/Fabric <input type="checkbox"/> Paper <input type="checkbox"/> Tile/Stone <input type="checkbox"/> Other (_____) |
| <b>Application location</b>                                                                     | <input type="checkbox"/> Indoor <input type="checkbox"/> Outdoor <input type="checkbox"/> Both                                                                                                                                                   |

| Primer required separately?                                                                    | <input type="checkbox"/> Required <input type="checkbox"/> Not required <input type="checkbox"/> Please advise                               | Some products require a primer + topcoat system                                       |
| Drying conditions (preferred temp/time)                                                        | _____°C / _____hours                                                                                                                         | Air-dry at room temp, or 60–120°C for heat-cured systems                              |
| Other required properties (chemical resistance, slip resistance, freeze-thaw resistance, etc.) | _____                                                                                                                                        |                                                                                       |

### ⑤ Priority of Intended Use / Purpose

Please rank the following purposes by priority (1, 2, 3...). Leave blank if not applicable.

|                                                       |       |
|-------------------------------------------------------|-------|
| Heat reflection / insulation (cooling cost reduction) | _____ |
| Heat dissipation (overheating control)                | _____ |
| Anti-corrosion (metal rust prevention)                | _____ |
| Fire-retardant / non-combustible (fire safety)        | _____ |
| Low-pollution (appearance retention)                  | _____ |
| Waterproofing                                         | _____ |
| Abrasion / slip resistance                            | _____ |
| Antibacterial / anti-mold                             | _____ |
| Other (please specify)                                | _____ |

### ⑥ Required Product Lifespan / Maintenance Cycle

|                                      |                                                                |
|--------------------------------------|----------------------------------------------------------------|
| Minimum desired performance lifespan | Minimum _____ years                                            |
| Desired recoat / maintenance cycle   | Every _____ years, or <input type="checkbox"/> To be discussed |
| Maintenance requirements (if any)    | _____                                                          |

### ⑦ Application Area / Estimated Quantity / Desired Delivery

|                                 |                                                                                                   |
|---------------------------------|---------------------------------------------------------------------------------------------------|
| Estimated application area      | _____ m <sup>2</sup> (or _____ pyeong)                                                            |
| Estimated required quantity     | _____ kg or _____ L (leave blank if unknown; we will calculate)                                   |
| Planned construction period     | Year _____ Month _____                                                                            |
| Desired quotation response date | Year _____ Month _____ Day _____                                                                  |
| Desired product delivery date   | Year _____ Month _____ Day _____                                                                  |
| Application contractor          | <input type="checkbox"/> In-house <input type="checkbox"/> Outsourced contractor (Company: _____) |

### ⑧ Certification / Test Report Requirements

|                                                       |                                                                                                                                                                                                                                                                                  |
